- Certified in PHP by MKCL.
- Awarded as a Microsoft Windows Insider MVP from Microsoft for the year 2017 – 18 .

Projects

- [EngBuzz for Windows :](#)
This app runs on both Windows and Android platforms where I worked on the one running on the Windows Platform. It provided 3 days everyday so that a person can improve their English vocabulary.
- [The WinTen Times for Windows :](#)
This is an app that runs on Windows Platform and is a shortcut handbook for all Windows Insiders as it contains data from BuildFeed about the latest compiled Builds and Build available on the Internet for Windows and also it provides Direct Download links to the ISO or ESD files for the released/leaked builds.
- [GizCentral :](#)
This is my own blog where me along with my team mates write everything latest related to Technology news from around the globe.
- **Gym Management System (Mini Project) :**
This is a Web interface for managing a Gym which acts as an interface between the gym trainer and the trainees.

- SLATrack (Major Project/Industry Based Project) :
This is a web and Android app based project . SLA refers to Service Level Agreement which is an agreement between the user and the service provider. This application can be used in multiple scenarios from Gas Pipeline Maintenance to Guard Patrolling .
- Student Information System (Industry Based Project, In Progress) :
With this Web based project, the attendance marking system takes a new turn . Now the students have to just walk in to the campus and their attendance will be marked in the database and a notification via SMS will be sent to their Parents or Guardian when they enter or leave the campus .

Education

- Pursuing BE Computer Science and Engineering, from SB Jain Institute of Technology, Management and Research, Nagpur (Final Year, Seventh Semester)

About Me

I am a geek who has a passion for technology, latest gadgets and software. I am an initiator, team player, trustworthy and simple being. I am passionate and serious about software development as a part of my career and also keep on doing some twerks, experiments with my gadgets, then innovating and learning something new. I am curious to learn more about Computer Science and Technology Field. The main thing that drives my interest further is the User Experience part.

All the above details are correct with best of my knowledge and my past.
